Naveen Sharma

AI Automation & Integration Engineer | SaaS Implementation Specialist | Workflow Automation

contact@naveensharma.net | naveensharma.net | LinkedIn | GitHub | opility.com

Open to remote roles hiring in Israel, local hybrid roles, B2B contracts and freelance projects.

Professional summary

AI automation and integration practitioner focused on no-code business workflows, AI assistants and practical website builds. Brings healthcare SaaS configuration experience, API/data mapping and technical troubleshooting, alongside independent Zapier and Apify projects. A long-standing ambition to engineer useful technology began with running a computer-training franchise in 2012; today, no-code tools and AI assistance turn that curiosity into working solutions.

Core capabilities

Workflow automation and integration

Zapier, Claude API, HubSpot, webhooks, REST APIs, JSON mapping, conditional routing and validation.

SaaS implementation

System configuration, dependent field logic, troubleshooting, output testing, documentation and Basecamp coordination.

AI building tools

ChatGPT/Codex, Claude, Gemini, Google AI Studio, Antigravity, GitHub, Cloudflare and Canva. AI-assisted website and assistant development.

Selected projects

Customer Inquiry Router | Zapier, Claude API, HubSpot

Built a personal workflow to classify inquiries, route priorities and connect CRM/email actions; documented setup, safeguards and troubleshooting. View project

Published Apify tools | B2B Lead Generator and Shopify Store Lead Extractor

Created tools that structure publicly available business and store information for research workflows. View projects

Portfolio, Ella and Opility | Website and assistant builds

Built websites with AI assistance and configured Ella to answer profile questions and broader AI/automation questions. Created an interactive intake and mapping demo. View project

Professional experience

SaaS Implementation Specialist | Bolt Healthcare | B2B contract

August 2022 - May 2026 | Remote

- Configured healthcare intake workflows with conditional fields, dropdown constraints, data mapping and multi-signer paths.
- Validated mapped outputs and integration data formats, including HHAeXchange; investigated missing bindings and submission issues.
- Coordinated fixes and handoffs through Basecamp; supported platform administration and helped colleagues understand configuration tasks.

Technical Operator - Process Operations & Quality Control | Vishay Intertechnology

November 2021 - May 2022 | Be'er Sheva, Israel

- Operated chip-resistor manufacturing equipment, followed production procedures, checked component quality and recorded operational issues.

Franchise Owner & Technical Operations Lead | Shivam Institute for Vocational Training

August 2012 - September 2015 | Dharamshala, India

- Managed student enrollment, schedules, fees, staff coordination and day-to-day academy operations; maintained computer-lab resources and resolved technical problems.

Education and professional development

Bachelor of Computer Applications (BCA) | Amity University Online

Bachelor's degree in Computer Applications.

Completed learning and qualifications

Zapier Academy: AI Builder, MCP and Account Admin Essentials; QA qualification, Smart College; JSM Fundamentals with AI, Atlassian.

Training & practice

Make, n8n, HubSpot, Salesforce, Airtable, Postman and Asana; WhatsApp chatbots and AI agents. Continuing learning through Microsoft Learn, Google Skills, GitHub Learn, OpenAI and Anthropic.
