

NAVEEN SHARMA

AI Automation & Integration Engineer | SaaS Implementation Specialist | Workflow Automation
Be'er Sheva, Israel | 058-789-6289 | contact@naveensharma.net | [linkedin.com/in/naveensharmatech](https://www.linkedin.com/in/naveensharmatech) | naveensharma.net

Available for Full-Time or Hybrid & B2B Contract roles

PROFESSIONAL SUMMARY

Analytical Systems Implementation Specialist with 4+ years of specialized experience in SaaS platform configuration and technical onboarding, within a 7+ year professional career in technical operations. Proven track record configuring and maintaining 500+ regulatory and compliance digital form workflows within a multi-tenant SaaS environment to meet strict compliance requirements. Expert at setting up complex dependent field logic, required fields, and relational database bindings to external system schemas, specifically validating data formats for integrations like HHAExchange. Highly skilled at managing technical support queues, conducting UAT mapping validation tests, and coordinating rapid product fixes with engineering teams within fast-paced Agile environments.

TECHNICAL SKILLS

- **SaaS Configuration:** Linked Fields, Dependent Logic, Field Mapping, Data Entry Validation, Dropdown Constraints, Multi-Signer Setup, Type-Specific Formatting, Multi-Tenant Platforms.
- **Testing & Operations:** User Acceptance Testing (UAT), Workflow Triage, Functional Regression Testing, API Data Layout Verification, Support Queue Optimization.
- **Tools & Ecosystems:** Jira, Basecamp, HHAExchange, GitHub, Cloudflare, Claude, Antigravity & AI Tools Efficiency.
- **Compliance Frameworks:** HIPAA Guidelines, Regulatory Data Capture Architecture, Federal/State Document Mapping (USCIS I-9, IRS W-4, State DOH Compliance).
- **Languages:** English (Professional), Hindi (Native), Hebrew (Conversational).

PROFESSIONAL EXPERIENCE

Healthcare SaaS Implementation Specialist | Bolt Healthcare (Remote, US Stack)

August 2022 – May 2026

- Configured and maintained 500+ interactive digital compliance and intake workflows within a multi-tenant SaaS platform, ensuring exact layout alignment and secure operational data capture.
- Applied advanced form behaviors using platform-native dependent field logic, required field constraints, custom dropdown validation parameters, and automated date formatting tokens.
- Developed multi-signer electronic signature pathways, mapping custom signature and initialization blocks for distinct real-world workflows, such as Patients, Caregivers, and Agency Representatives.
- Mapped variable user input data fields directly to structural enterprise system schemas to ensure validated, schema-compliant data exports to partner integrations including HHAExchange.
- Conducted comprehensive User Acceptance Testing (UAT) via daily "Run Mapping Test" cycles to isolate data validation issues, missing bindings, and deployment discrepancies.
- Managed cross-functional communication pipelines over Basecamp and Jira, tracking support workflows across specialized processing gates (including "Needs Mapping" and "Needs Testing") to resolve technical system bottlenecks.
- Exercised Super-Admin platform privileges to coordinate secure customer portal onboarding, agency permission sets, and account access structures.

Technical Operator (Quality Control & Validation) | Vishay Intertechnology, Inc. (Be'er Sheva, Israel)

November 2021 – May 2022

- Conducted precision functional checks and strict quality control gates on high-reliability components for medical and telecommunications supply chains.
- Maintained exhaustive performance documentation and analyzed automated machine telemetry data to ensure compliance with international quality standards.

Founder & Technical Operations Manager | Shivam Institute for Vocational Training (India)

August 2012 – September 2015

- Directed the full operational and infrastructure lifecycle of a technical training center, driving enrollment scaling up by 25%.
- Supervised the local network infrastructure, technical hardware laboratories, and workflow tracking matrices supporting multi-track vocational programs.

EDUCATION & CERTIFICATIONS

- **Bachelor of Computer Applications (BCA)** in Cloud & Security | Amity University Online (Jan 2022 – Feb 2026)
- **QA Engineering Certification** (Web & Mobile Validation) | Smart College (Sep 2021)
- **Certifications:** Software Testing, Test Automation Foundations, Software Engineering Logic
- **Trained:** Jira, Google Cloud Architecture
